Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 May 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☒ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Election/Restrictions

The restriction requirement as set forth in the Office action mailed on 04/09/09 has been withdrawn. All of the claims have been examined on the merits.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d)..

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the gear-receiving hole and opening of claim 12, the through hole of claim 14 and the post and hole of claim 15 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate

changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because indicators to the missing features in the drawings will need to be added.

Appropriate correction is required.

Claim Objections

Claim 17 is objected to because it is dependent on claim 15 which teaches four gears not three gears as taught in claim 16. Appropriate correction is required.

Claim 24 is objected to because it is dependent on claim 15 which teaches four rack supporting members not three rack supporting members as taught in claim 24.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: claims 7-16 and 18-23 are allowed over the prior art of record.

In regard to claims 7 and 16, among other limitations, the holder member having three or four pairs of shafts disposed thereon, the three or four gears being respectively rotatably assembled to the three or four pairs of shafts, the key top forming at least three or four rack supporting members on a bottom thereof, wherein the at least three or four rack supporting members are respectively parallel to corresponding gears and engage with corresponding gears to provide the upward and downward movement for the key switch are neither disclosed nor suggested by the prior art of record. Claims 8-15 and 18-23 are either directly or indirectly dependent on claim 7.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

In regard to the cited prior art, Nishino et al. [US 7,138,587], Sato et al. [US 6,586,695], Sato et al. [US 6,371,671], and Pan [US 6,060,676] are pertinent because they teach: a key top; holder member; gears; a spring member; a film circuit board; and a supporting member. Sato et al. [US 6,586,695] is pertinent art because it teaches: a key top; holder member; gears; a spring member; a film circuit board; and a supporting member.
